

If you need help finding the url for your Success Community Profile, follow these simple step by step directions.

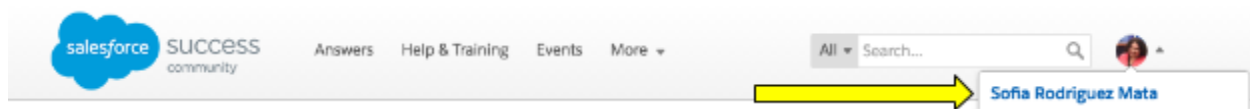

1. Log-in to the Success Community by going to success.salesforce.com/loginswitcher. Use the email and password associated with your Salesforce credentials.

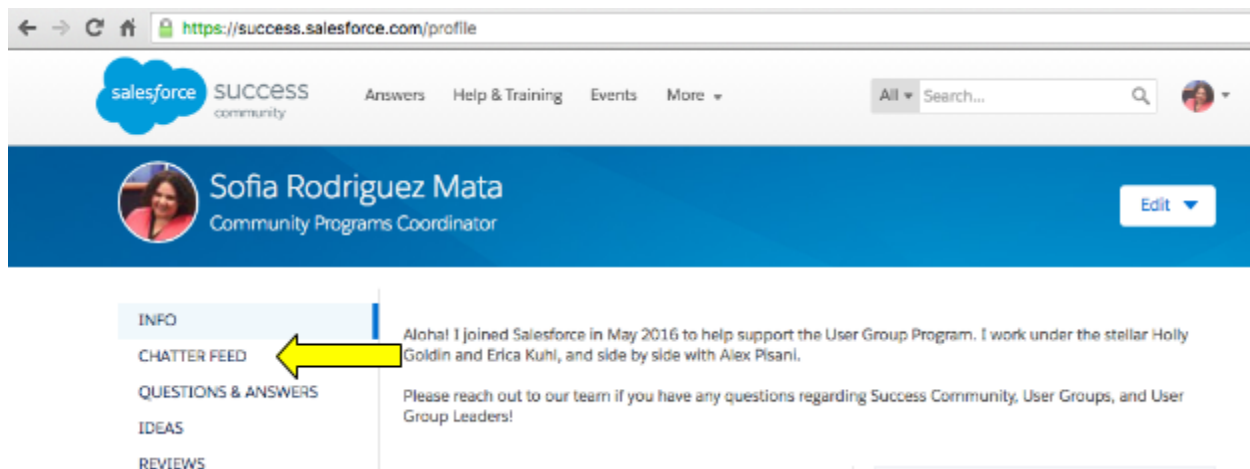

2. Once logged in, look for your profile picture on the upper right hand corner of the page.

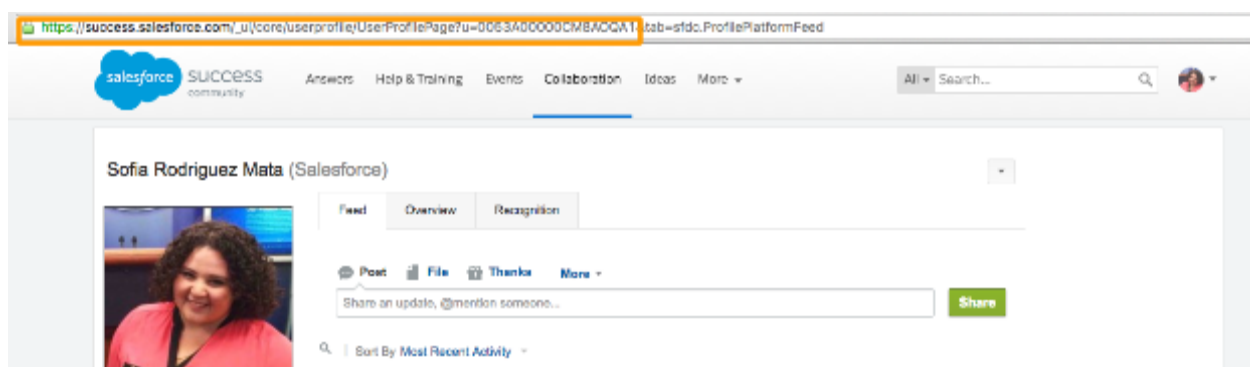

3. Click on your profile picture and a menu with different options will appear below your profile picture. Click on the first option, which is your full name and email.

4. You'll be taken to a new page with the url `success.salesforce.com/profile`. This is **not** the url you want to copy. Instead, look to the left under your name and title, for "Chatter Feed". Click through that.

5. You'll be taken to your chatter feed. Up on the browser, you'll want to copy everything before the "&tab".

6. You're all set! This is the url for your Success Community Profile.
