

Unlock savings, resilience, and sustainability with battery storage and power quality solutions.

## Live Webinar: September 2nd 10am - 11am PT

Large energy users in California can face disruptions in their operations and high energy costs. This year, these issues have been exacerbated by California's recurring rolling blackouts and current energy supply shortages.

# WEBINAR: ENERGY STRATEGIES FOR LARGE INDUSTRIAL BUSINESSES IN CALIFORNIA

Join Stem, the leader in commercial energy storage in California, and Royal Industrial Solutions, a Stem partner helping large industrial customers drive production efficiencies and reduce energy costs, as they outline strategies to:

- Improve power quality at your facility through the use of energy storage and other energy solutions
- Eliminate the risk of site outages with a microgrid or backup power solution
- Optimize your power quality solutions to also reduce energy costs at your facility
- Take advantage of incentives available to California businesses for battery storage (SGIP) and planned Federal Policy updates (ITC Stand Alone and adders)

---

**If your business values resiliency,  
or is at risk of experiencing power quality issues,  
You don't want to miss this session!**
